6) SENIOR A / UNDER 23 SELECTION PROCESS NOTES:

Coaches: Rowing Australia reserves the right to select coaches at various intervals for more than one season.

Athletes and coaches should refer to the selection criteria found in Part 4 of the Selection Policy. Invitations to the 2nd Selection Regatta and Trials and subsequent national selection into the Australian Rowing Teams will be made at the discretion of the Selectors from the available and appropriate criteria. The Board of Rowing Australia will consider the recommendations of the selectors for approval;

- (a) Coaches
- (b) Squads
- (c) Transisiton arrangements from squads to crews
- (d) Team

before team selection can be advised.

Whilst the Selection Policy gives the Selectors the discretion to vary crews and squads, the Selectors aim to select Athletes for final crews or squads following the completion of the Selection trials on 20 April 2008. Again this selection is based on the range of criteria in the Selection Policy. It may be more common than not for athletes named in squads at 20th April to be named as members of the Australian Rowing Teams with only the crew selection to be confirmed. The provisions contained in Part 3 of the Selection Policy articulate the selectors' role in this process.

Athletes and coaches should note that one of the criteria for their selection is their ability to train in the designated training location and travel to the required overseas competitions with their crew or squad. They must be aware that in 2008 the Senior A team are also required to pay seat fees.

SELECTION OF 2007 SENIOR A / UNDER 23 SQUADS TO CREWS:

Although there is a strong preference for Senior A Non Olympic and Under 23 crews to have an un interrupted and consistent preparation the policy does allow for continued evaluation particularly to ensure we get our best overseas results and the selection of squads may assist to facilitate this process. See comments and process below.

The primary purpose of this strategy is to ensure that the final selection of crews to represent Australia at the World Championships will take into account, amongst other factors, both the continuing form and compatibility of the athletes, as well as relative category strengths in comparison to known world standards. This strategy is consistent with the objective of the Selection Policy (see paragraph 1.1).

The squad principle does not apply to the categories in which crews have already been selected but other provisions in part 3 of the Selection Policy allow for continuing assessment to be made. The following process will apply to the squads that are announced following either the February Selection Trials (lightweight women) or the April Selection Trials:

- The time line for crew finalisation has been set for Monday 23rd June 2008, approximately a month before the heats of the World Championships. (An extension to this deadline may be requested by the coaches if exceptional circumstances, such as injury, weather and the like deem this to be appropriate. This will then be clearly communicated to the athletes in the squads.)
- Where appropriate the Selectors and coaches may identify the final composition of a crew/s from the squad prior to this time.

The method to be used by the Selectors in determining final crews from the squads that were announced after the April Selection Trials will comprise;

- 1) The initial assessment of results used for the selection of the squad;
- 2) Specific internal assessments conducted during training that are monitored and recorded by the coaches from April 28 – June 22 in accordance with an initial plan prepared by the Selectors and crew coach by the 12th May, and at other times where required and communicated to the athletes at these times.
- 3) For Lightweight Senior A Women: Specific internal assessments conducted during training that are monitored and recorded by the coach/es from 27th February – June 22 in accordance with the initial plan prepared by the Selectors and crew coach/es by the 17th March, and at other times where required and communicated to the athletes at these times.
- 4) Consideration of the Selection Criteria set out in Part 4 of the Selection Policy. (this could include past results, team harmony and the like.)
- 5) Consultation with the crew coach consistent with 2.5.5 of the Selection Policy.

Squad members should also be aware that no decisions have been made with regard to priority boats in each category and that these decisions will only be made following a review of the performances of squads and crews in preparation.

Athletes should in the first instance discuss their role within the squad with their nominated crew coach should they have any concerns regarding progression within the squad. The nominated crew coach and athlete may then raise any issues with the selectors through the Chairman of Selectors.

7) JUNIOR SELECTION PROCESS NOTES:

- The “Objective” of the Selection Policy is to select the best possible team with the best chance of winning medals at the World Junior Championships. Only athletes who can demonstrate that they can meet this objective can be considered.
- All nominees are to race the small boat (1x, 2-) at the April Selection Regatta. Results will be evaluated against prognostic standards. Small boat decisions may be made according to the subsequent performances of individual athletes or crews or from their individual result. The selectors may consider athletes other than those who are placed first in their event.
- A “National” approach to crew selection will take place. Nominees must note the request for relevant information on the “Schedule to Nomination Form”. State based crews are encouraged but where an opportunity exists to consider options of interstate selection to meet the objectives of the Selection Policy then this will be considered by the selectors. Under 18 year old athletes will require “Parental Consent” in regards to their nomination and training location.
- After the big boat races on Saturday am, the selectors will consider the results against prognostics (taking into account all relevant factors) and determine whether further trials will take place. At this point it is possible that winning crews will be assessed to determine whether further trials are

likely to find better crews from available athletes who meet the selection criteria. These trials may be conducted from Saturday pm until no later than Monday am. States are encouraged to have completed rigorous assessment prior to the SIS/SAS Head Coach approving the eligible entry to minimise the trialling process.

- All athletes and coaches recommended for selection are to remain at Penrith until at least midday Sunday if trialling is completed prior to this time. The official team announcement will be made after approval by the RA Board at a date to be confirmed nearer to the event.

8) ERGOMETER PROTOCOLS:
